- The mRNA injections were not health interventions but engineered biological weapons. The spike protein shares structural similarities with snake venom neurotoxins, functions as a replicating nerve agent that the body produces continuously, crosses the blood-brain barrier, damages blood vessels and triggers microclots—all known before the rollout.

- The standard medical practice of pulling back on the syringe plunger to check for blood before injection was quietly dropped during the COVID vaccine rollout, officially to avoid "extra pain." This allowed the spike protein to circulate throughout the body within seconds, lodging in the heart, brain and ovaries, likely causing countless deaths.

- The book reveals a planned sequence: Stage one involved the aerosolized release of the spike protein into the environment months before official cases were reported, as confirmed by wastewater samples from October 2019. Stage two packaged the same spike protein into a "vaccine" injected into billions, making the problem and the solution come from the same hands.

- The book traces modern vaccinology back to ancient snake venom rituals and connects it to the Nazi development of VX nerve agent. It documents how Bachem, a Swiss peptide manufacturer, supplied synthetic peptides for the spike protein sequence, keeping

contracts with Moderna and government biodefense agencies secret behind non-disclosure agreements.

- The book offers solutions for those harmed, including critical copper and zinc balance, a "glycan avoidance strategy" removing processed foods that mimic the spike protein, intermittent fasting for autophagy and natural compounds like nattokinase and curcumin.

"The Glycan Conspiracy: Unmasking the Engineered War on Humanity" is not your typical health book. It's not another diet fad or supplement guide. This is a bombshell—a meticulously documented exposé that connects dots most people don't even know exist. And once you see the full picture, you can never unsee it.

The book opens with a gut-punch: the mRNA injections were never about health. They were engineered biological weapons. The author doesn't just make claims. They walk you through the evidence, starting with the spike protein itself.

According to the book, the spike protein shares structural similarities with snake venom neurotoxins. The cysteine patterns—those disulfide bonds that determine a protein's shape—match perfectly with three-finger toxins found in cobra venom. This isn't fringe science. The author, a respected venom researcher, had their findings rejected by journals and was even expelled from professional societies for publishing this data. Why? Because the truth threatened too many powerful interests.

The book argues that the spike protein functions as a replicating nerve agent. Unlike VX gas, which is a one-time exposure, the mRNA makes your body produce this toxic protein continuously—sometimes for months or years. It crosses the blood-brain barrier. It damages blood vessels. It triggers microclots. And all of this was known before the rollout.

For decades, medical professionals were trained to pull back on the syringe plunger before injecting to check for blood—a simple step that prevents accidental intravenous injection. During the Wuhan coronavirus (COVID-19) vaccine rollout, this practice was quietly dropped. The official reason? It caused "extra pain."

Let that sink in. A safety measure designed to prevent potentially fatal mistakes was abandoned to avoid a moment of discomfort. When a vaccine meant for the muscle goes straight into a vein, the spike protein circulates throughout the entire body within seconds. The lipid nanoparticles lodge in the heart, brain and ovaries. This single decision may have caused countless deaths.

The two-stage attack

The book reveals what the author calls a "two-stage attack" on humanity. Stage one: aerosolized spike protein was released into the environment—in Wuhan, in European cities, in

the United States—months before any official cases were reported. Wastewater samples from October 2019 showed spike protein fragments in countries that supposedly had no cases. Wind patterns showed the first clusters appearing downwind of major cities. This was not a natural outbreak. It was a planned release designed to create terror.

Stage two: after months of fear and lockdowns, the same spike protein was packaged into a "vaccine" and injected into billions of willing arms. The problem and the solution came from the same hands.big

Perhaps the most disturbing section traces the roots of modern vaccinology back to ancient snake venom rituals. The author connects the dots from Egyptian priests who controlled both venom and antidote, through Albert Calmette's serum therapy in the 1800s, to the Nazi development of VX nerve agent—"Agent Venomous X"—which shares its molecular blueprint with the spike protein.

The book documents how Bachem, a Swiss peptide manufacturer, supplied the synthetic peptides used to design the spike protein sequence. These peptide libraries contain toxin-mimicking sequences and contracts with Moderna and government biodefense agencies were kept secret behind non-disclosure agreements.

What this means for you

The book offers practical, actionable solutions for those who've been harmed. Copper and zinc balance is critical—the spike protein depletes copper reserves and high-dose zinc without copper creates dangerous deficiencies that can fuel cancer. Hair mineral analysis can reveal hidden imbalances that standard blood tests miss.

The "glycan avoidance strategy" involves removing processed foods that contain sugars and gums mimicking the spike protein's structure, keeping your immune system stuck in chronic activation. Intermittent fasting triggers autophagy—your body's way of cleaning out spike protein remnants. Natural compounds like nattokinase, bromelain and curcumin can break down the spike protein itself.

The book doesn't shy away from the spiritual dimension. It frames this war as a battle between God's design for human health and a Luciferian system that seeks to destroy it. The Passover plate—lamb, bitter herbs, unleavened bread—is presented as a divinely designed nutritional protocol for plague protection. Psalm 91 becomes an active shield against engineered bio-weapons.

Final thoughts

"The Glycan Conspiracy" is not an easy read. It will challenge everything you think you know about medicine, government and the nature of reality. But that's precisely why you need to

read it.

We are living through history's greatest deception. The question is: will you remain asleep or will you wake up?

This book is a wake-up call. It's a survival manual for a world gone mad. And it just might save your life.

Pick up a copy. Read it with an open but critical mind. Share it with those you love. Because the truth—no matter how painful—is always the first step toward freedom.
